

BizFlight.NET

YOUR TURNKEY SOLUTION

THE Business Aviation Software

HW & SW Overview **2010**

BizFlight.NET Hardware & Software Requirements

In general BizFlight.NET needs a fully functional TCP/IP network with one or more workstations and at least one server.

The TCP ports 5199 and 1433 may not be blocked between workstation and server.

BizFlight.NET needs an application directory somewhere on the server which is shared to the users in the network. The BizFlight.NET client will be installed on the server as well as on desired workstations.

Following you see a brief description of HW/SW requirements which depends on the assumption that you only have BizFlight.NET. Other applications have to be considered accordingly.

Workstation

Processor

600 MHz Pentium III-compatible or faster processor; 1 GHz or faster processor is recommended.

Memory

1 GB RAM or more; 2 GB is recommended.

Operating System

Windows XP Professional SP2; Windows 2000 Professional SP3; Windows Server 2003; Windows Server 2008; Windows Vista Business or higher.

HW & SW Overview 2010

Server

Processor

600 MHz Pentium III-compatible or faster processor; 1 GHz or faster processor is recommended.

Operating System

Windows 2000 Professional SP4; Windows XP Professional SP2; Microsoft Windows Server 2000 SP4; Windows Server 2003 Standard Edition, Enterprise Edition or Datacenter Edition SP1; Windows Small Business Server 2003 SP1; Windows Server 2008 Standard Edition, Enterprise Edition or Datacenter Edition; Windows Small Business Server 2008. 64bit Editions are *not fully supported* for the time being.

Memory

1 GB RAM or more; 2 GB or more is recommended. Amount of RAM depends on other software running on the same machine. Consider that solely SQL Server needs at least 512 MB RAM for full performance.

Exchange Server (as well as Domain Controller) and SQL Server on same machine is not recommended!

Software Requirements

Windows Installer 3.0. Windows Installer 3.1 is recommended; Internet Explorer 6.0 SP1
Microsoft SQL Server 2005 Workgroup Edition or higher (Express Edition can be used for a maximum of 3 Workstation).

Hard Disk

20 MB for BizFlight.NET

On x86: 280 MB for .NET2 framework (if not already installed)

On x64: 610 MB for .NET2 framework (if not already installed)

425 MB for SQL Server 2005 (if not already installed)

Display

SXGA (1280x1024) or higher-resolution video adapter and monitor.
